Week ending October 4, 2009

Released: 3:00 P.M., October 5, 2009

According to the National Agricultural Statistics Service in Mississippi, there were 3.3 days suitable for fieldwork for the **week ending Sunday, October 5, 2009**. Rainfall ceased briefly last week and allowed producers to complete some fieldwork, but scattered rains returned across most of the state and halted fieldwork activities over the weekend. According to reports, the excess precipitation is deteriorating the quality of cotton, soybeans, and corn. Hay harvesting has slowed due to the wet soil conditions. Soil moisture was rated 2 percent short, 24 percent adequate and 74 percent surplus.

Crop progress for week ending 10/04/09

Crop	This week	Last week	Last year	5-year average
	Percent	Percent	Percent	Percent
Corn, harvested	82	80	94	98
Cotton, open bolls	85	74	91	96
Cotton, harvested	1	0	12	43
Hay-Warm Season, harvested	95	93	97	97
Peanuts, harvested	2	0	42	--
Rice, mature	99	96	98	100
Rice, harvested	42	29	69	87
Sorghum, mature	100	100	98	100
Sorghum, harvested	58	47	80	96
Soybeans, turning color	91	83	95	99
Soybeans, dropping leaves	74	59	84	95
Soybeans, harvested	40	30	57	79
Sweet Potatoes, harvested	26	25	52	59

Crop condition for week ending 10/04/09

Item	Very poor	Poor	Fair	Good	Excellent
	Percent	Percent	Percent	Percent	Percent
Corn	7	20	30	41	2
Cotton	9	13	41	37	0
Pasture	1	9	38	39	13
Peanuts	0	0	27	56	17
Rice	5	6	37	52	0
Sorghum	3	9	49	39	0
Soybeans	8	20	26	39	7
Sweet Potatoes	5	50	30	15	0

Comments

“Weekend rain stopped all harvesting. Cotton pickers were able to get started last week. We still need lots of sunshine.”

— Don Respass, Coahoma

“Producers had a couple of days to harvest soybeans. We received some rain over the weekend that will delay any field activities this week.”

— Melvin Oatis, Benton

“The crops continue to go downhill. Beans are about a 50% loss, cotton is 50% loss, and corn is 20-30% loss. The little amount of milo we had is a 100% loss. The crops will not dry down so we can harvest the corn and beans. We have to wait on the top crop of cotton so we will have something to pick.”

— Stephen R. Winters, Grenada

“Pastures dried some after 3 weeks of rainfall. Some ryegrass was planted; however, very little hay was harvested due to wet soil conditions. The forecast calls for more rain next week. Armyworms are still a problem in Bermuda hay fields and pastures.”

— Mike Howell, Lee

“Field conditions allowed soybean harvest to begin. Damaged soybean seed levels range from 15% to greater than 40%.”

— Jay Phelps, Pontotoc

“We got a good run of five days for harvesting our weather damaged crops, but wet weather has set in again. Many of the soybeans are running more than 20% damaged, which is a damaged level higher than the elevators will buy.”

— Jerry Singleton, Leflore
