Some of the grains had a surprise rally on Friday after the big rally on Thursday. Soybeans went up, but wheat and corn went down due to the report that came out today which was bearish for corn and wheat.

Heavy rains and flooding in southern and eastern U.S. growing areas stalling fall harvest and potentially harming some crops. A freeze in the forecast for the Northern U.S. may also harm any portion of the crop that is not fully mature.

Rain on the Grand Prairie has put a hold on harvest with better weather in the forecast next week.
